

Modules, Tiers & Pricing — Summary Sheet

16 sellable suites · 6 subscription tiers · 4 premium add-ons · metered usage · implementation packages. Source of truth: `entitlements.ts` + `PLAN_SEED` (docs/36).

1 · Modules by group — 16 suites in 6 groups

SUITE	#	MODULES (PERMISSION TOKENS)	CHARACTER
 A · Foundation			
Core (always-on)	6	users · dashboard · approvals · mobile · images · audit-track	Never gated — every plan keeps it
 B · Finance			
Finance & Accounting	4	AR · AP/creditors · GL & exec (posting/close/reporting) · treasury (TRE-01..05)	Maker-checker on every posting
 C · Sales & Customer			
Sales & POS	8	POS · order mgt · claims · CRM · delivery · returns · price lists · promotions	Front-of-house revenue engine
CRM & Loyalty	2	loyalty/points · surveys	Members, tiers, campaigns
Customer Portal	10	order · dashboard · inventory · POS · BOM · variance · my-CRM/suppliers/POS/users	Diner QR + member self-service
 D · Supply Chain			
Inventory & Warehouse	3	warehouse/WMS · lots · locations	Recipe-driven depletion, blind counts
Procurement	2	procurement (PR → PO → GRN) · pr_raise (company-wide requisition)	Blind-count receiving, 3-way match
Master Data	2	master data I/O · BOM master	Registry-driven bulk import/export
Planning & Analytics	2	supply planner · marketing analytics	Forecast, replenishment signals
 E · Platform			

SUITE	#	MODULES (PERMISSION TOKENS)	CHARACTER
AI Copilot	1	ai_chat (also token-metered)	Ceiling + metered-overage model
Multi-branch	1	branch consolidation	Cross-branch roll-up
Self-service Portals	2	employee ESS · vendor portal	Leave, own-data, supplier self-serve
 F · Premium Verticals (add-on / Enterprise)			
Manufacturing / MRP	◆	QMS (NCR/CAPA) + Manufacturing · MRP · RCCP · routings · shop-floor · APS	Decorator-gated (@RequiresSuite)
Projects / PPM	◆	WBS · Gantt · EVM · baselines · RACI · subcontracts · PMR	Token-less — decorator-gated
HCM & Payroll	◆	HR · HR-admin · payroll · recruiting · onboarding · training · comp · ESS	Payroll posts to GL
Real Estate (Developer)	◆	property/space & developer management	Token-less — decorator-gated

Counts are coarse module permission tokens (42 total across suites A–E). ◆ Premium verticals are **controller-gated** (@RequiresSuite) — their functional depth exceeds their token count.

2 · Modules by price tier

SUITE ↓ PLAN →	FREE	SME	STANDARD	BUSINESS	PROFESSIONAL	ENTERPRISE
Price (monthly)	฿0/mo	฿690/mo	฿2,900/mo	฿4,900/mo	฿9,900/mo	Custom/mo
Annual (2 months free)	—	฿6,900/yr	฿29,000/yr	฿49,000/yr	฿99,000/yr	Custom/yr
Seats included	2	1	10	25	50	∞
Locations	1	1	2	5	10	∞

 included

 available as paid add-on

 not available

All tiers are a superset of the one below — **except SME** (solo edition: full operational breadth, 1 seat).

3 · Add-ons & usage pricing

3a · Premium-suite add-ons (onto Business / Professional; bundled in Enterprise)

ADD-ON SUITE	MONTHLY	ANNUAL	AVAILABLE ON
Manufacturing (MRP / QC / APS)	+฿6,000/mo	+฿60,000	Business · Professional
Projects (PPM / EVM)	+฿4,500/mo	+฿45,000	Business · Professional
HCM (HR & Payroll)	+฿3,500/mo	+฿35,000	Business · Professional
Real Estate (Developer)	+฿6,000/mo	+฿60,000	Professional only

3c · Implementation packages (one-time, sold with every paid plan)

PACKAGE	ONE-TIME	SCOPE
Launch	฿30,000	Remote: master-data import, COA review, 2× training, go-live checklist
Standard	฿80,000	+ on-site day, opening-balance migration, P2P/O2C/R2R walkthrough, UAT support
Enterprise	฿150,000+	+ multi-branch rollout, custom SoD-matrix review, e-Tax/bank setup, 30-day hypercare

3b · Metered usage — the real "consumption add-ons"

PLAN	AI TOKENS	E-TAX DOCS	POS TXNS
Free	—	—	—
SME	100k/day incl · ฿12 / 1k over	200 docs/mo · ฿3 / doc	5,000/mo · ฿0.50 / txn
Standard	not included	100 docs/mo · ฿3 / doc	3,000/mo · ฿0.50 / txn
Business	not included	300 docs/mo · ฿2.5 / doc	10,000/mo · ฿0.40 / txn
Professional	200k/day incl · ฿12 / 1k over	1,000 docs/mo · ฿2 / doc	30,000/mo · ฿0.30 / txn
Enterprise	2M/day incl · ฿8 / 1k over	unlimited	unlimited

AI is ceiling + metered-coverage — never unlimited. Included daily tokens are free; usage between "included" and "max" is billed per 1,000; the first request past the hard ceiling returns AI_BUDGET_EXCEEDED. This ties the price to upstream token COGS so a heavy tenant is never served at negative margin.

No self-serve add-on checkout (by design). Add-ons apply via a per-tenant features.suites override on a custom plan row / invoice line — add-on buyers need implementation anyway. Published prices are anchors, not a transactable cart.

📄 4 · Things you should know

SME is a special edition, not just a cheap tier. It carries the **full operational spine** (finance → procurement → planning → CRM → AI) at ฿690, fenced by a **1-seat / 1-location** cap. `control_profile='sme'` also relaxes maker-checker (self-approval) — orthogonal to the plan. Upgrading to Enterprise re-instates full SoD + adds the verticals.

14-day self-service trial on a real tenant — data created in trial carries into the paid plan. Trials are entitlement-granted all suites during the window.

Annual = 2 months free (10-month pricing). Multi-currency published (THB + USD); currency resolution is **fail-closed** — an unlisted currency errors rather than silently falling back to THB.

The "Business" rung was added deliberately to close the old Standard → Professional cliff (2,900 → 9,900 with nothing between). Steps are now ~1.7× each. Existing subscriptions keep their price until renewal.

Enforcement is behind a kill-switch. Suite/plan gating only bites when `ENTITLEMENTS_ENFORCE` is on (god-bypassed, trial-granted). Confirm it is enabled in an environment before relying on these fences commercially.

The map is CI-guarded. `tools/ci/check-entitlements.mjs` fails any PR where a module token is unassigned or the map drifts — every one of the 42 tokens must live in exactly one suite.

🗨 5 · Assessment & the underlying idea

The idea in one line — sell **bundled suites** (not single modules) along **two independent axes**: **breadth** (how many suites) and **scale** (seats / locations / usage quotas). Tiers move both, every tier is a clean superset of the one below, so an upgrade is an **entitlement flip, never a migration** — the "land & expand" engine. Heavy verticals and variable-cost usage (AI) are held out and priced separately so the ladder stays simple and margin-safe.

Well-judged — the **Business** rung (procurement + multi-branch) genuinely fixes the price cliff and matches a growing chain's next need. **SME** is a smart wedge: full ERP for a solo owner, seat-capped so it can't cannibalise the multi-seat ladder. **Enterprise** correctly bundles the four heavy verticals for the group / pre-IPO buyer. Metering AI on a ceiling model is the right call for COGS discipline.

Watch #1 — procurement placement vs. the F&B story. Procurement is gated at **Business (฿4,900)**, yet the whole sales narrative is "blind-count receiving closes the fraud gap." A genuine 10-seat, 2-location F&B shop on **Standard** can't purchase in-system without jumping a tier. It's a deliberate upsell lever, but for this ICP procurement arguably belongs in Standard — expect price pushback here.

Watch #2 — AI & procurement look "bimodal." A prospect comparing feature lists sees the **฿690 SME** plan include AI + procurement + planning while the **฿2,900 Standard** plan does not. The real answer is seats/scale, not features — but it needs a crisp sales narrative or it reads as inconsistent. Same for AI (SME ✓, Standard/Business ✗, Pro ✓).

Watch #3 — Free is a funnel, not a product. No finance, no sales/POS — you cannot run a business on it. That's intentional (evaluation / lead capture), but don't position it as a usable free tier.

Net — the packaging is coherent, CI-guarded, and the superset property makes expansion frictionless. The one substantive commercial question is **whether procurement should sit one tier lower** given the F&B ICP; everything else is sound. Confirm `ENTITLEMENTS_ENFORCE` is live before quoting the fences as real.
